PROFESSIONAL SUMMARY

Experienced Android developer specializing in debugging, optimizations, and writing scalable code with a keen understanding of aligning technical solutions with business objectives to develop intuitive and easy-to-use product

EDUCATION

B.Tech. in Electrical Engineering, IIT Kanpur
Intermediate - CBSE, RBSE

July 2015 – April 2019
May 2013 – July 2015

TECHNICAL SKILLS

Android Development : Kotlin, Java, XML, Android Studio, Compose, Retrofit, Hilt/Dagger, Room, Coroutines, Flow

DevOps and Tools : Git, Gradle, Postman, Charles, Firebase, Superset

EXPERIENCE

Software Developer 3 | Glance

Jan 2023 – Present

- Designed, improved, and implemented **Analytics** in glance apps, enhancing session telemetry metrics. Revamped impression and click analytics in an existing SDK project, optimizing event tracking and simplifying analysis in Superset. Implemented real-time analytics for the Spaces project, managing networking, micro-batching, and server sync using gRPC. Architected and integrated analytics for the avatar app, supporting events at Glance server and Firebase Analytics
- Designed and implemented the logic for **IPL widget**, providing live match updates along with content widgets on the **lock screen**. Coordinated with Xiaomi to add support for various widget formats on the lock screen and communicated updated statistics. Developed a system to handle live IPL updates in a small widget and display Glance content in a medium widget
- Worked with a team on **AOSP** to deliver in-house RemoteView widgets, supporting various widget types and modes on the lock screen. Collaboratively developed an SDK to facilitate communication between lock screen actions and the app
- Designed Face scan, used **Clean architecture** and coroutines to develop an avatar generation app. Utilized **ML Kit and Camera API** for face detection, doing math and logic to get best input image to ensure successful face capture to enhance avatar generation quality. Added configurable support for asynchronously scanning gallery images
- Developed Myra, a chatbot, leveraging **Bing and GPT APIs** to serve as a chat assistant on the lock screen. Incorporated **Compose animations** for smooth loading and rendering of user chats and responses, seamlessly fetched from a database via a flow handling loading bounce getting updated with response from api

Software Developer 2 | Glance

July 2021 – Dec 2022

- Refined **glance rotation** and changing algorithms on the lock screen to be configurable, effectively managing card repetition scenarios during low battery mode. Implemented a time frequency cap to ensure the optimal delivery of the next card or ad based on priority and various conditions
- Improved the latency of Glance data by merging two Glance data calls by 50%. This approach simultaneously managed Glance removal, updates, and additions. Utilized **coroutines** for concurrent execution, marking successful Glances for caching while rejecting faulty ones via an exception handler
- Fixed legacy bugs and memory leaks, improving overall performance and optimizing app size with strong **debugging skills**
- Enhanced performance by **optimizing glances download and cleanup** improving app size, memory and efficiency
- Improved engagement metrics by **persisting the lock screen glance** app into the home screen post-unlock and integrated app shortcut feature handling app lifecycle with launch mode
- Responsible for releasing and sdk integration with OEM. Collaborated with OEMs to integrate a tappable ribbon on the lock screen, providing more clickable area to explore glances which **improved DEU** by 70%
- Provided mentorship to junior team members, offering guidance as they developed professionally and reviewing their PR's. Additionally, supported other teams that depended on our platform, promoting synergy and enhancing efficiency

Software Developer 1 | Glance

Jan 2020 – July 2021

- As part of the Engagement team, made various user-centric features such as Battery Saver, Data Saver, Corona/Sport Widget, Pocket Mode, and Silent Mode etc
- Collaborated with a revamp **one-click install feature**, enabling app installs via Glance by triggering a broadcast to Xiaomi
- Developed an online and offline game fragment, enhancing user experience by introducing pre-cached games for offline use. Implemented a pager for quick access to the best games and integrated in-game ads and native sponsored videos
- Implemented FCM notifications to re-engage users who have disabled Glance, while handling Glance-enabled notifications

Software Developer 1 | Roposo

June 2019 – Dec 2019

- Contributed to a **video streaming SDK**, enabling the delivery of cached videos through the SDK for integration in Glance
- Integrated quick-access dialogs for gift and paid video downloads, utilizing Roposo coins earned to enhance revenue

Intern | NoBroker, Bangalore

May 2018 – July 2018

- Collaborated with a colleague to develop a new app to record over 20K + calls daily, aimed at resolving issues related to conversation disputes for a property deal. Used firebase authentication and storage to store these call recordings
- Implemented RentalAgreement activity UI in Nobroker App, giving a pager of rental agreements

ACHIEVEMENTS

- Received the Bond007, BuzzLight Feed, Rising Star Awards from Glance for outstanding contributions
